

Public Utility Operator Position Village of Dexter

The Village of Dexter is seeking a full-time Public Utility Operator for the Wastewater System. The position works day shift hourly and may be included in a rotation schedule with other operators to cover weekends. This position will include duties of a technical, semi-skilled nature as well as labor work in the operation, maintenance and repair of equipment and machinery in wastewater operations. Duties may involve meter reading and maintenance, testing and sampling water/wastewater, interpreting lab data for process control, and maintaining pumps, transmission systems and plant equipment. Duties may also include additional responsibilities in water system maintenance and general public services as needed.

Dexter's Wastewater Treatment Facility is a Conventional Activated Sludge process with tertiary filtration. Dexter's Water System is a ground water well system, consisting of 5 wells, with iron filtration.

Preferred Qualifications:

- Three to five years experience as an operator in a wastewater treatment plant or comparable work experience.
- State of Michigan Wastewater Licensing
- Safety Program experience.

Requirements:

- Ability to respond to emergencies, including those that occur outside of normal business hours.
- Proof of certifications (if applicable), a drug test and a physical.

Physical Demands and Work Environment:

- Candidates must be able to climb steps, create reports, bend, stoop, lift and pull (up to 75 lbs).

Qualified candidates should mail or e-mail their cover letter, resume, wage history and three references to:

Village of Dexter
Attn: Donna Dettling
8140 Main Street
Dexter, MI 48130
E-Mail: ddettling@dextermi.gov

First review of applications will be April 30, 2014. The position is open until filled with a target hire date of June 1, 2014. The Village of Dexter is an Equal Opportunity Employer.
